DETAILED ACTION

1) Restriction to one of the following inventions is required under 35 U.S.C. 121:

I. Claims 1-5, drawn to a recording and reproducing apparatus for recording/reproducing information into/from a recording medium provided with a first track area where one side wall is wobbled and a second track area where the other side wall at a non-wobbled side in said first track is wobbled, classified in class 369, subclass 44.13.

II. Claims 6-8, drawn to a recording medium provided with a first track area where one side wall is wobbled and a second track area where the other side wall at a non-wobbled side in said first track is wobbled, further provided with an adjusting area showing a correspondence of a wobbling polarity to a track area, classified in class 369, subclass 275.3.

2) The inventions are distinct, each from the other because of the following reasons:

3) Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the recording and reproducing apparatus as claimed does not require that the other side wall at a non-wobbled side in the first track is provided with an adjusting area. The recording medium has separate utility such as in a disk drive that has a different photodetector than that claimed in group I.

Art Unit: 2653

4) Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

5) Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

6) Any inquiry concerning this communication or earlier communications from the examiner should be directed to Kimlien T Le whose telephone number is 703 305 3498. The examiner can normally be reached on M-F 8a.m-5p.m.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, William Korzuch can be reached on 703- 305- 6137. The fax phone numbers for the organization where this application or proceeding is assigned are 703 -872 -9314 for regular communications and 703 -872 -9314 for After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is 703- 305 -3900.
